

sunglasses for children
made of recycled plastic

New brand, Okky-eyewear

Okky-eyewear is made of recycled plastic, in collaboration with WFO Waste free Oceans.

With the purchase of Okky-eyewear, our ocean, rivers and beaches literally become a little cleaner. You will also support the great work of WFO.

Okky-eyewear offer 100% UV filter in Cat.3 and it protects the eyes from the brightest light. Okky-eyewear is suitable for children from 4 to 10 years.

WFO
WASTE FREE OCEANS

The story behind Okky-eyewear

After plastic was invented in the late 19th century, mass production of plastic began around 1950. The so-called plastic era.

Plastic is easy to produce and can no longer be ignored in our daily lives. But plastic practically does not decay and that is a life-size problem.

Plastic not only pollutes our nature, it also threatens our flora and fauna.

made
from
waste
okk)

Every year, 4.7 million tons of plastic ends up in the oceans and 1 million birds and 100,000 mammals die from eating plastic waste.

The production of plastic releases carbon dioxide, this leads to global warming and is bad for health. Everyone knows that plastic pollution must stop. Recycling is a good solution, but at the moment, half of all plastic produced is a intended for single use. Products made from recycled materials are

more expensive than products made from new soils. This is due to the production chain which is not yet being set up properly for recycling

With Okky we want to actively contribute to the development of sustainable production in the eyewear industry.

We have a large network in the world of eyewear and we will not stop until we have really made a difference.

eyewear box

One box Okky-sunglasses contains: 30 pcs., 2 models in 5 different colors.
